GUARANTEES & ACCREDITATIONS

Designed to achieve:

- Secured by Design - Police Preferred Specification
- PAS 24:2012 (enhanced security performance)
- BSEN 1670:2007 Grade 5 (exceptionally high corrosion resistance)
- BSEN 1935:2002 Grade 12 (extreme durability achieving 200,000 cycles under load)

25 years Mechanical Guarantee
10 years Surface Finish (powder coated) Guarantee
5 years Surface Finish (plated) Guarantee

ProSecure Door Hinge

Faster to fit than any other hinge
From the box to fitted in under 58 seconds

- The only hinge supplied in one piece, ready-to-fit straight from the box
- 2 installation options:
Glider technology allows the hinge to slide straight onto the frame in one complete piece. Or, for low reveals, simply remove the pin to front-fit
- Patented front adjustment method is fast not fiddly
- Virtually jigless, only 2 holes to pre-drill
- Designed to achieve the extreme performance requirements of BSEN1935:2002 Grade 12
- Police Preferred Specification

PROSECURE HIGH SECURITY DOOR HINGE

FASTER TO FIT THAN ANY OTHER DOOR HINGE

The ProSecure door hinge is the only door hinge supplied in one piece, ready-to-fit straight from the box.

TWO INSTALLATION OPTIONS

Mila's Glider technology allows the whole hinge to slide directly onto the frame. Or, for low reveals, simply remove the steel pin and front-fit the hinge.

VIRTUALLY JIGLESS

Minimal preparation is required - only two holes need to be pre-drilled on the frame.

The hinge lid is held cleverly captive, pivoting open and closed. Lift the lid to screw the concealed fixing datum directly to the sash in seconds.

PATENTED FRONT ADJUSTMENT METHOD

+/- 5mm lateral adjustment can be achieved from the front of the hinge, with 90° rotation of a 4mm Allen key, which can then 'locked' into place to prevent adjustment creep. Vertical (+5mm) and compression (+/-1mm) adjustment can also be achieved from the top of the hinge for full 3D refinement.

INTELLIGENT ACCESSORIES

The hinge is supplied with optional loose fixings lugs enabling you to choose where to fit them depending on what profile you are using for optimum installation.

Static-cling TechTape protects the hinge lid during fabrication and installation.

A removable rubber tongue ensures that the hinge lid remains open until installation is complete.

EXTREME PERFORMANCE TESTED

The hinge has been independently tested to the enhanced security requirements of PAS 024:2012, extreme corrosion resistance tested to BSEN1670:2007 grade 5 and tested to BSEN1935: 2002 grade 12 - achieving 200,000 cycles under 100kg load for extreme operational reliability.

Two hinges will easily carry a 100kg sash.

The hinge is a Police Preferred Specification product and is Secured by Design accredited.

AT A GLANCE

The Only Hinge Supplied Fully Assembled in One Piece
ready-to-fit straight from the box

Faster Than Any Other Hinge
Proven to be faster to fit than other security hinges in time trials under test conditions

2 Installation Options
Slide-on or front-fit - the choice is yours

Glider Technology
Fix the Glider to the frame, then simply slide the whole hinge onto it - fast, simple

Front-Fit
The hinge can be fitted from the front too - simply remove the steel hinge pin. Perfect for low reveals

Virtually Jigless
Only 2 holes to pre-drill

Captive Hinge Lid
Pivots open & closed for fast, easy installation

Patented Adjustment
Our patented front adjustment method is fast not fiddly! Rotate your Allen key 90° to achieve +/-5mm lateral adjustment

Rubber Tongue
Ensures the hinge lid remains open until installation is complete
